Inset Map 15	- Rudgwick & Bucks Green		

1. Introduction

- 1.1 This Council is required to include a Proposals Map in its Local Development Framework, which should explain geographically the adopted policies and proposals of the Development Plan Documents. The Proposals Map must reflect the most up-to-date spatial plan for the District and so will need to be revised when new policies and proposals are adopted. Inset Maps have been prepared at a larger scale than the Proposals Map to show certain areas in more detail. The area that the Inset Maps cover is shown precisely on the Proposals Map.
- 1.2 The Proposals Map will be maintained in paper copy for inspection but will also be available in electronic form to enable it to be easily updated when new policies and proposals are adopted.

2. Proposals Map

- 2.1 The Proposals Map document is a key component in the 'portfolio' of documents which comprise the Horsham District Local Development Framework. This Proposals Map reflects the policies and proposals of the adopted Core Strategy (2007); the Site Specific Allocations of Land (2007); and the General Development Control Policies (2007) documents.

3. Next Steps

- 3.1 The Council is also preparing other Development Plan Documents. As each Development Plan Document is adopted, the adopted Proposals Map will be updated to include the policies and proposals contained in that document.
- 3.2 For further information on the Local Development Framework process, or if you have any queries on this document, please contact a member of the Strategic and Community Planning Department of this Council on 01403 215398.
